The very first steps

Top-level menus

TG1 – TG2 – TG3 – TG4 – TG5 – TG6 – TG7 – TG8 – Effects – Master Volume – Performance

TG stands for Tone Generator, corresponding to a TF module of a Yamaha TX816 — effectively, each TG represents one instance of Dexed.

Arrows < > on the second display line indicate whether a menu point or a parameter can be accessed by turning the encoder left or right.

The Mighty Encoder

With the encoder, you control everything:

Turn the encoder: Move sideways through the menu or tweak a parameter.

Short press: Dive one level deeper into the menu.

Long press: Jump one level up.

Double-click: Don't panic — that's the Home function! Return to the top-level menu at “TG1”.

Loading a Performance

At the top-level menu, rotate the encoder to select Performance.

Press the encoder once: the display will show "Performance" and "Load".

Press the encoder again to access the Performance selection.

Rotate to select a Performance and press to load it.

Performance Banks

MiniDexed organizes Performances into Banks.

Each Bank can hold up to 128 Performances.

In the menu under Performance → Bank, you can load different Banks.

 **Keep on rockin'!**
